Lab 2: Getting Started with Rails.

You are required to read, understand, and follow the [Getting started](#) page from the Rails Docs. After reading this guide, you will know:

- How to install Rails, create a new Rails application, and connect your application to a database.
- The general layout of a Rails application.
- The basic principles of MVC (Model, View, Controller) and RESTful design.
- How to quickly generate the starting pieces of a Rails application.

You should follow these sections from the guide:

1. Creating a New Rails Project.
2. Hello, Rails!
3. Getting Up and Running
4. Adding a Second Model
5. Refactoring
6. Deleting Comments
7. Security

Then you should implement a SignUp/SignIn feature:

- As a user, I should be able to register in the blog website with username, email, password.
- As a user, I should be able to login to the blog using username or email and my password.
